SALINI IMPREGILO WINS €171M CONTRACT TO BUILD ENI'S NEW HEADQUARTERS IN MILAN

Milan, July 28, 2017 – Salini Impregilo has won a €171 million contract to build the new corporate headquarters of ENI, Italy's energy giant, in Milan. Located in the municipality of San Donato Milanese in the city's southeast, the headquarters will be based on a design by Morphosis Architects, the U.S. architecture firm led by Pritzker Prize winner Thom Mayne.

The complex will consist of three interconnected buildings for 4,600 employees on 65,000 square metres of gross leasable land or a net 57,000 square metres. The complex will include a cafeteria, a conference centre and a public exhibition space. The project is to be completed in 30 months. It will apply standards of energy efficiency and environmental sustainability to meet Gold Leadership in Energy and Environmental Design (LEED), one of the most popular green building certification programs in the world.

Each of the three buildings will be connected to one another by so-called sky-bridges. The Icon Tower will be the tallest at 11 floors and will have space for 1,300 employees. The Landmark Tower will instead be the largest, covering 23,700 square metres on nine floors. The Skygarden Tower at the centre of the complex will house a conference centre. Lamaro Appalti SpA will also take part in the project.

The contract reinforces Salini Impregilo's track record for innovative and iconic buildings. In Athens, it recently completed the Stavros Niarchos Foundation Cultural Centre, while in Milan it built Palazzo Lombardia, the seat of the Lombardy regional authority. Among its current projects, Salini Impregilo is at work on the Meydan One Mall in Dubai in the United Arab Emirates where it is known for the Sheikh Zayed Grand Mosque in Abu Dhabi.

Salini Impregilo is a leading global player in the construction of major complex infrastructures. It specializes in the water sector, where it is recognized by the Engineering News-Record (ENR) as the global leader for the 4th consecutive year, as well as railways and metro systems, bridges, roads and motorways, large civil and industrial buildings, and airports. The Group has 110 years of applied engineering experience on five continents, with design, engineering and construction operations in 50 countries and more than 35,000 employees from 100 nationalities. Salini Impregilo is a signatory of the United Nations Global Compact and pursues sustainable development objectives to create value for its stakeholders. It assists clients in strategic areas including energy and mobility, helping to drive development and well-being for current and future generations. Its leadership is reflected by projects such as the new Panama Canal, the Grand Ethiopian Renaissance Dam in Ethiopia, the Cityringen metro in Copenhagen, the metro system in Riyadh, the Stavros Niarchos cultural centre in Athens, the new Gerald Desmond Bridge in California. In 2016, revenues totalled €6.1 billion (including U.S. subsidiary Lane Construction, leader in roads and highways), with a total backlog of €36.9 billion. Salini Impregilo Group is headquartered in Italy and is listed on the Milan Stock Exchange (Borsa Italiana: SAL; Reuters: SALI.MI; Bloomberg: SAL:IM).
