### **SALINI IMPREGILO FOR LIGURIA'S YOUNG MEN AND WOMEN, TO ENDORSE THE #PROGETTIAMOCILFUTURO VOCATIONAL PROGRAMME**

*Milan, November 27, 2019* - Salini Impregilo endorsed the new vocational guidance programme for young men and women called #Progettiamocilfuturo, promoted by the Italian region of Liguria, placing its focus on the territory, once again, which takes off by focusing on young people. The Company has already committed to promoting educational initiatives in Genoa. Salini Impregilo, with other signatories of the Registro dei Testimonial (Endorsers Register), which Councillor Cavo defined " *a quality mark for all companies demonstrating their great responsibility towards the young*", will collaborate in vocational guidance projects for students of schools of the Liguria Region, to help them choose their educational path, more mindfully, taking them closer to the occupational scenario.

These young men and women, from Liguria's schools, will be met by managers of Salini Impregilo and other companies, who will offer a brief scenario of their personal and professional experiences. This first encounter with the occupational arena, will also become more tangible when these youngsters visit the headquarters of the endorsing companies. The aim, as always, is to help them mindfully choose their professional future.

The initiative is part of the talent attraction programmes for young people endorsed by the Salini Impregilo Group, which offer training and promotes technical culture. These activities aim at selecting the most talented young people, offering vocational guidance and tutoring of the various career paths of the construction sector. They are carried out through strategic partnerships with the most prestigious Italian and international universities: Just like the *Master's in International Construction Management*, organized with Milan's Polytechnic University. Or through initiatives engaging students and new graduates, like our career days, or our themed workshops in universities, our presentations and our worksite visits.

Salini Impregilo's adherence to the initiative promoted by the Italian Region of Liguria demonstrates, once again, how greatly committed the Group is towards this territory, where it is already building, in fact, the new Bridge on the Polcevera River, with Finacantieri, in the purposely established consortium, PerGenova. But also, the railway line of the Terzo Valico dei Giovi, as the leading company of the general contractor Cociv. Workshops and training meetings are also organized at the Spazio Ponte permanent exhibition. Here, families and youngsters can virtually participate in the new bridge's construction. It is a place capable of also letting the smaller visitors know all about the world of large infrastructure. Its labs and immersive multi-sensorial formats also made it the protagonist of the Science Festival that took place in Genova, at the beginning of November.

*Salini Impregilo is one of the major global players in the construction of large, complex civil infrastructure. For five years it has been ranked No. 1 in the water infrastructure sector by Engineering News-Record (ENR) and as of 2018 has achieved ranking in the Top Ten of the Top Environmental Firms. It is also a leader in the transport infrastructure sector, being involved in major sustainable mobility projects in rail and metro systems around the world. It has successfully built some of the world's most iconic projects: bridges, roads and motorways, civil and industrial buildings, and airports. The Group has 113 years of engineering experience on five continents, with design, engineering and construction operations in nearly 50 countries and more than 35,000 employees from over 100 nationalities. It is a signatory of the United Nations Global Compact as it pursues the sustainable development goals of its clients, from clean water and 2 energy to sustainable mobility to buildings with a low environmental impact. Its expertise is displayed in projects such as the Grand Paris Express metro system, Cityringen in Copenhagen, Sydney Metro Northwest, Red Line North Underground in Doha and Line 3 of the Riyadh Metro. Other projects include the expansion of the Panama Canal, the Rogun hydroelectric dam in Tajikistan, the Anacostia River and Northeast Boundary tunnels in Washington, D.C. and the Al Bayt 2022 World Cup stadium in Qatar. In 2018, new orders totalled €6.0 billion, with a total backlog reaching €33.4 billion. Salini Impregilo Group is headquartered in Italy and is listed on the Milan Stock Exchange (Borsa Italiana: SAL; Reuters: SALI.MI; Bloomberg: SAL:IM)*
