

PRESS NOTE

WEBUILD'S DIGITAL INFOPOINT BRINGS TRANSPARENCY TO GROUP'S PROJECTS IN ITALY

MILAN, January 20, 2021 – Webuild announces the launch of [Digital Infopoint](https://infopoint.webuildgroup.com/en/), a new communications channel that will open a window onto the Group's 14 projects under construction in Italy. The projects, which promote sustainable mobility and green buildings, range from the Brenner Base Tunnel in the north to the Bicocca-Catenanuova railway section in the south. The projects provide work to more than 11,000 people, with Webuild working alongside a long supply chain of excellence.

The Digital Infopoint (<https://infopoint.webuildgroup.com/en/>) is an interactive map that allows visitors to discover each project: the stages of construction, the progress of work on each site, and the benefits that a project brings to the area where it is located - from employment to economic development.

Following the success of the infopoint set up during the construction of the Genova San Giorgio Bridge in the port city of Genoa, the Digital Infopoint will bring greater transparency to the development of other public works with the aim of involving the Group's stakeholders and the public at large in its activities. After Italy, the platform will gradually expand overseas, enriched by live initiatives.

In Italy, Webuild is committed to developing infrastructure that contributes to the expansion of sustainable mobility services. Projects like the Bicocca-Catenanuova rail section in Sicily and the high-speed/high-capacity railways like the Brenner Base Tunnel, Terzo Valico dei Giovi and Naples-Cancello section will become part of the Trans-European Transport Network (TEN-T) to strengthen links across the European Union. Others, like the M4 metro line in Milan, the C metro line in Rome and that of Naples, will make urban commuting more efficient and environmentally friendly. Respect for the environment throughout the life of a project can also be found on the 106 Ionian Highway in Calabria, the Marche-Umbria Quadrilateral and green buildings like the ENI head offices in Milan.

All of these projects are supported by an Italian supply chain, composed of thousands of businesses with unique skills and technology. Webuild's five main projects in Italy where 5,000 people work have a combined value of €4.4 billion, underlying the impact that they have employment and economic development – in addition to the public service that they will provide.

Webuild, the new group born in 2020 from Salini Impregilo, is a leading global player in the construction of large, complex projects for sustainable mobility, clean hydro energy, clean water, green buildings, supporting clients in achieving sustainable development goals (SDGs). The Group is the expression of 114 years of engineering experience applied in 50 countries on five continents with 70,000 direct and indirect employees from more than 100 nationalities. Recognized for five years by Engineering News-Record (ENR) as the world leader in water infrastructure (such as dams, hydraulic tunnels, water and wastewater management, and water treatment and desalination plants), it ranks since 2018 among the top 10 in the environment sector and it is also leader in sustainable mobility (especially metro and rail lines, in addition to roads and bridges). A signatory of the United Nations Global Compact, the Group's expertise is displayed in projects such as the M4 metro line in Milan, Grand Paris Express, Cityringen in Copenhagen, Sydney Metro Northwest, Red Line North Underground in Doha, Line 3 of the Riyadh Metro and the high-speed railways in Italy. Other projects include the new Genoa Bridge and the new Gerald Desmond Bridge in Long Beach, California, the expansion of the Panama Canal, the Snowy 2.0 hydroelectric power station in Australia, the Rogun hydroelectric dam in Tajikistan, the Anacostia River and Northeast Boundary tunnels in Washington, D.C. and the Al Bayt 2022 World Cup stadium in Qatar. In 2019, new orders totalled €8.1 billion, with a total backlog reaching €36.2 billion. Some 85% of the backlog for construction orders involves projects tied to the sustainable development goals of the United Nations (SDGs), while 60% concerns the reduction of greenhouse emissions. Webuild, subject to direction and coordination by Salini Costruttori SpA, is headquartered in Italy and is listed on the Milan Stock Exchange (Borsa Italiana: WBD; Reuters: WBD.MI; Bloomberg: WBD:IM).
