WEBUILD: "BUILDING SIGHTS. A JOURNEY THROUGH CONTEMPORARY INFRASTRUCTURES", THE NEW PHOTOGRAPHIC STORY OF WEBUILD'S CONSTRUCTION SITES WORLDWIDE

Milan, December 29, 2021 - A photographic journey through the images of the infrastructure built by the Webuild Group in over 115 years of history. A leap from the skyscrapers of Panama City to the deserts of the Middle East, from the extreme geometries of Copenhagen to the wrinkles on the workers' faces on our Italian construction sites. This is the journey of "Building Sights. A Journey through contemporary infrastructures", the book published by the Webuild Group, and edited by Rizzoli, a selection of shots of photographer Edoardo Montaina.

"Infrastructure - explains Pietro Salini, Webuild CEO, in the introduction to the book entitled "Frontiers", is essential for socio-economic development. The very etymology of this word immediately makes us think of our communal living, of the great works that make it possible for people to change their lives, which then change the destiny of entire communities, providing them with the means to go beyond their borders".

In Edoardo Montaina's photographic book, available also in a [digital edition](#), the shots narrate the frontiers in construction sites, the place where a great work is born, and where Man meets nature. Privileged access to the Webuild Group's "work in progress", capable of illustrating the innovation, strength and beauty that can be found in each engineering feat undertaken.

Faces, geometries, cities, nature, visions, speed, work, are moments and places that come to life in the photos of the author, who began his career in 1985, and has held various exhibitions around the world over the years.

The book is a journey through the large construction sites of the Webuild Group worldwide. An illustration of how the Group has evolved in terms of experience and a track record of over 80,000 km of roads, almost 14,000 km of railways and metros, 2,300 km of tunnels, almost 1,000 km of bridges as well as 313 dams and hydro-electric plants.

Webuild, the new group born in 2020 from Salini Impregilo, is a leading global player in the construction of large, complex projects for sustainable mobility, clean hydro energy, clean water, green buildings, supporting clients in achieving sustainable development goals (SDGs). The Group is the expression of 115 years of engineering experience applied in 50 countries, on five continents, with 70,000 direct and indirect employees, from over 100 nationalities. Recognized for five years by Engineering News-Record (ENR) as the world leader in water infrastructure (such as dams, hydraulic tunnels, water and wastewater management, and water treatment and desalination plants), it ranks since 2018 among the top 10 in the environment sector. It also leads the sustainable mobility sector (especially metro and rail lines, in addition to roads and bridges). A signatory of the United Nations Global Compact, the Group's expertise is displayed in projects such as the M4 metro line in Milan, Grand Paris Express, Cityringen in Copenhagen, Sydney Metro Northwest, Red Line North Underground in Doha, Line 3 of the Riyadh Metro and the high-speed railways, in Italy. Other projects include the new Genoa Bridge and the new Gerald Desmond Bridge in Long Beach, California, the expansion of the Panama Canal, the Snowy 2.0 hydroelectric power station in Australia, the Rogun hydroelectric dam in Tajikistan, the Anacostia River and Northeast Boundary tunnels in Washington, D.C. and the Al Bayt 2022 World Cup stadium in Qatar. In 2020, the Group's total order backlog reached €41.7 billion, with 89% of the backlog of construction orders involving projects supporting the SDGs set by the United Nations. Webuild, subject to direction and coordination by Salini Costruttori SpA, is headquartered in Italy and is listed on the Milan Stock Exchange (Borsa Italiana: WBD; Reuters: WBD.MI; Bloomberg: WBD:IM).
