

PRESS NOTE

**WEBUILD WINS AWARD FOR
BEST INTRANET IN ITALY AT “INTRANET ITALIA CHAMPIONS”**

- *Webuild Group’s “@work” intranet site wins best intranet award for 2021 for design solutions*
- *Intranet awarded for innovative design, user experience*
- *@work follows international trend toward digital workplace model*

MILAN, May 20, 2022 – “@work”, the corporate intranet that connects men and women within the Webuild Group, has won the “Best Intranet 2021” award in the latest edition of the Intranet Italia Champions held during Intranet Italia Day in Milan, an event dedicated to the latest digital trends in internal communication. The assigning of this coveted award was based on criteria including innovative solutions, the quality of the content, and its design.

The award, which celebrates the best intranet sites in Italy, was assigned by a jury of experts in corporate communication. In 2021, many Italian companies conceived, designed and implemented intranet projects and digital workplaces that have had a significant impact on companies and their employees. In addition to Webuild, Poste Italiane, Unipol Agos and Atlantic Technologies also received awards.

“@work” came first in the “Soluzioni di design” (Design Solutions) category for the innovative design and visual impact, ability to combine multiple functions, coherence, scalability and the quality of the user experience. It serves as a touch point for the Group’s employees. It acts as a useful platform to create a collective identity, shortening the distances among employees and keeping them involved at a time when smartworking has become more frequent. It is an example of how intranet platforms are becoming more integrated digital workplaces.

Webuild, the new Group born in 2020 from Salini Impregilo, is a leading global player in the construction of large, complex projects for sustainable mobility (rail, metro, bridges, roads, ports), hydropower (dams, power plants), water (treatment and desalination plants, wastewater management, irrigation dams) and green buildings (civil and industrial buildings, airports, stadiums, hospitals). It supports clients in achieving the Sustainable Development Goals (SDGs) established by the United Nations. The Group is the expression of 116 years of engineering experience applied in 50 countries with 80,000 direct and indirect employees from more than 100 nationalities. Iconic projects, completed or under construction, include the M4 metro line in Milan, a section of Line 16 of the Grand Paris Express, Cityringen in Copenhagen, the viaduct and bridge for Sydney Metro Northwest in Australia, Red Line North Underground in Doha, Line 3 of Riyadh Metro and high-speed railways in Italy. Others include the Genoa San Giorgio Bridge in Italy, the Long Beach International Gateway Bridge in Long Beach, California, the expansion of the Panama Canal, the Snowy 2.0 hydroelectric scheme in Australia, the Rogun hydroelectric dam in Tajikistan, the Anacostia River and Northeast Boundary tunnels in Washington, D.C., and the Al Bayt 2022 World Cup stadium in Qatar. At the end of December 2021, it had a total order backlog amounting to €45.4 billion, with 92% of the construction backlog relating to projects linked to SDGs. Webuild, subject to direction and coordination by Salini Costruttori S.p.A., is headquartered in Italy and is listed on the Milan stock exchange (Borsa Italiana: WBD; Reuters: WBD.MI; Bloomberg: WBD:IM).
