

NOTE

CSC COSTRUZIONI (WEBUILD) COMPLETES RENOVATION OF RENENS TRAIN STATION IN SWITZERLAND

- *Completed renovation of historic Renens train station's passenger building near Lausanne*
- *Webuild confirms commitment to projects for sustainable development of communities*

RENENS, Switzerland, September 2, 2022 – CSC Costruzioni of the Webuild Group has completed the renovation of the passenger building of the historic train station in Renens near Lausanne in Switzerland. Commissioned by the real estate unit of Swiss railway operator FFS, the project preserved the original features of the building while updating its safety features, its accessibility and its energy efficiency. With the railway in service and the presence of other construction activity nearby, workers took care to complete the project as carefully as possible.

The renovation of the station is part of a wider project of urban renewal that involves the towns of Renens, Chavannes-près-Renens, Crissier and Ecublens, FFS, the canton of Vaud and the public transport company of Losanne (TL). It also confirms Webuild's commitment to projects that support the sustainable development of communities and their contribution to preserving historic buildings and structures to renew their usefulness to communities.

At the same location, Webuild and its Swiss subsidiary CSC Costruzioni recently delivered Parc du Simplon, an urban renewal project with green buildings that created a new residential and commercial district approximately 5 kilometres from the centre of Lausanne. Awarded the "Minergie P" Swiss certification for sustainability, the office buildings follow the principles of a circular economy, containing reusable materials

and sporting solar panels on their rooftops that produce approximately 50% of electricity needs. Elsewhere In Switzerland, CSC is working on other sustainability projects, such as the renovation of historic buildings of the United Nations Palais des Nations in Geneva.

Webuild, the new Group born in 2020 from Salini Impregilo, is a leading global player in the construction of large, complex projects for sustainable mobility (rail, metro, bridges, roads, ports), hydropower (dams, power plants), water (treatment and desalination plants, wastewater management, irrigation dams) and green buildings (civil and industrial buildings, airports, stadiums, hospitals). It supports clients in achieving the Sustainable Development Goals (SDGs) established by the United Nations. The Group ranks first in the world for the construction of infrastructure in the water sector. Since 2018, it is also among the top 10 companies by revenue generated from environmental services. Webuild is the expression of 116 years of engineering experience applied in 50 countries with 80,000 direct and indirect employees from more than 100 nationalities. Iconic projects, completed or under construction, include the M4 metro line in Milan, a section of Line 16 of the Grand Paris Express, Cityringen in Copenhagen, the viaduct and bridge for Sydney Metro Northwest in Australia, Red Line North Underground in Doha, Line 3 of Riyadh Metro and high-speed railways in Italy. Others include the Genova San Giorgio Bridge in Italy, the Long Beach International Gateway Bridge in Long Beach, California, the expansion of the Panama Canal, the Snowy 2.0 hydroelectric scheme in Australia, the Rogun hydroelectric dam in Tajikistan, the Anacostia River and Northeast Boundary hydraulic tunnels in Washington, D.C., and the Al Bayt 2022 World Cup stadium in Qatar. At June 30, 2022, the Group had a total order backlog amounting to more than €47 billion, with 90% of the construction backlog relating to projects linked to SDGs. Webuild, subject to direction and coordination by Salini Costruttori S.p.A., is headquartered in Italy and is listed on the Milan stock exchange (Borsa Italiana: WBD; Reuters: WBD.MI; Bloomberg: WBD:IM).
