WEBUILD: SANT'AGNESE IN AGONE CRYPT IN PIAZZA NAVONA, ROME, TO SHINE AGAIN

ARTISTIC LIGHTING PROJECT DONATED BY THE GROUP TO CONTRIBUTE TO ENHANCING THE ITALIAN ARTISTIC HERITAGE

Milan, January 20, 2024 – A new light will shine upon a historical and artistic jewel in the heart of Piazza Navona, in Rome: the recently restored Sant'Agnese in Agone Crypt, after almost twenty centuries, is in fact now at the very centre of a new artistic lighting and architectural project donated by the Webuild Group.

The initiative, launched the day before January 21, the day when the Saint is celebrated, allowed to restore the Crypt's original and intimate atmosphere, respecting the story of the Saint's martyrdom, thanks to a complex light and shadow effect. The imposing, steeped in history St. Agnese in Agone Church is nestled between the halls and fornixes of Domitian's Stadium, standing on the site where, according to tradition, the 12-year-old Christian girl Agnese suffered martyrdom during the persecutions under the emperor Diocleziano in 305 AD.

The lighting project created by Faber Technica, and followed by Rome's Special Supervisory Board, aims to enhance the spatial, architectural, and artistic features of the Crypt. It involves protecting the works that are present through the use of LED lighting, sources with zero UV and low heat emissions, in compliance with current regulations regarding user safety and the conservation of the frescoed surfaces.

The donation is part of the Group's "Agenda Cultura," the set of cultural projects promoted and organized by Webuild, following the "Superbarocco" initiative, for which Webuild last year organized its own concert event in the Church in Piazza Navona.

Webuild is carrying out 10 major infrastructure projects in Italy, working closely with the Supervisory Boards in safeguarding and enhancing archaeological assets that are discovered, just like in Rome, for the Metro C line. The project indeed represents a double challenge: an engineering one, on the one hand, but with regard to protecting the cultural and historical heritage present in Rome's city centre. For Line C, which runs through the heart of Rome, four archaeo-stations have already been planned: San Giovanni (already opened), Piazza Venezia, Porta Metronia, and Colosseo/Fori Imperiali, all designed to display and enhance the archaeological structures and artifacts found during our excavations.

Webuild is a global leader in the design and construction of large, complex projects in the sectors of sustainable mobility (rail, metro, bridges, roads, ports), hydropower (dams, power plants), water (treatment and desalination plants, wastewater management, irrigation dams) and green buildings (civil and industrial buildings, airports, stadiums, hospitals). It supports clients in achieving the Sustainable Development Goals (SDGs) established by the United Nations. The recognised leader in infrastructure for the water sector, it operates in 50 countries. It has 85,000 direct and indirect employees from 100 nationalities, and a supply chain of more than 17,500 businesses. In its 117 years of applied engineering on more than 3,200 projects, the Group has built 14,118 kilometres of rail and metro lines, 82,509 kilometres of roads and highways, 1,018 kilometres of bridges and viaducts, 3,396 kilometres of tunnels, and 313 dams and hydropower plants. Projects include the Genoa San Giorgio Bridge, the second Panama Canal, the Lake Mead Third Intake hydraulic project near Las Vegas in the United States, the Airport Line in Perth, Australia and the Stavros Niarchos Foundation Cultural Center in Athens. Projects under construction include the Brenner Base Tunnel, Line 4 of the Milan metro system, the Terzo Valico dei Giovi-Nodo di Genova in Italy, and the North East Link of Melbourne in Australia. As of June 30, 2023, the Group had total orders worth €61 billion, with more than 90% of the Group's construction backlog related to projects linked to the advancement of the United Nations 2030 Sustainable Development Goals (SDGs). Webuild, subject to the direction and coordination of Salini Costruttori S.p.A., is headquartered

in Italy and is listed on the Milan stock exchange (WBD; WBD.MI; WBD:IM). Since 2021, it is member of the MIB ESG, the index of Italian companies with the best ESG practices.
