

PRESS NOTE

FISIA ITALIMPIANTI (WEBUILD GROUP) WINS LARGEST ITALIAN PROJECT IN THE LAST YEARS IN THE CLEAN WATER SECTOR

€91MILLION PROJECT TO ENLARGE AND MANAGE WASTE WATER TREATMENT PLANT IN VICENZA

- *Fisia Italimpianti is among the most competitive global contractors in the water treatment and desalination sectors. It will enlarge and manage for 4 years the municipal wastewater treatment plant in the Vicenza area, in Italy.*
- *The plant will serve 300 thousand people. To build it, approximately 300 new workplaces will be created, both direct and indirect.*

Milan, May 10, 2024 – It is the largest Italian project of the last decade in the water treatment sector, and it will be built by a consortium led by Fisia Italimpianti (Webuild Group). The project is worth a total €91 million and foresees enlarging and managing for four years the wastewater treatment plant of Vicenza. The actual contract of the project commissioned by Viacqua S.p.A., the water service managing company of the province of Vicenza, is expected to be signed in the forthcoming days. The work will serve approximately 300 thousand citizens of Vicenza and nearby towns and is therefore greatly significant for the territory. This also confirms the Group's strategic role in providing innovative solutions with a strong outlook on environmental sustainability when meeting Italy's water challenges.

The project foresees the executive design, the ordnances clearance operations, and reorganizing and rationalizing the sewage and wastewater system relating to the waters in the Vicenza area. It will be built by Fisia Italimpianti, which will lead with a 69.8% share the consortium with ICM, Integra and STA

The consortium is also responsible for the management and ordinary and extraordinary maintenance activities relating to the plant for the first 4 years starting from when the plant is first commissioned. The project will be completed in 5 years, creating approximately 300 new jobs (directly and indirectly). It therefore represents a growth opportunity that brings greater value to the local supply chain and, in general, to the territory too.

The Webuild Group has been a global leader in the water infrastructure sector for over a decade already. In fact, 25% of its total revenue, on a cumulated basis, as of December 31, 2023, comes from the clean hydro energy and clean water sectors. In fact, sustainable design and the construction of water treatment and desalination plants are sectors where the Group is greatly expanding. Fisia Italimpianti, with experience gained from more than 95 years in the business, is among the most competitive global contractors in the industry, with wastewater treatment plants installed and under construction for more than 10.9 million people worldwide, and with the desalination plants built serving more than 20 million people a day, particularly in the Middle East.

Webuild is a global leader in the design and construction of large, complex projects in the sectors of sustainable mobility, hydropower, water management and production, and green buildings. For many years, the recognized leader in the water sector, also ranking among the Top 10 international players in Australia, Europe and the US, the Group has consolidated experience in 50 countries. In almost 120 years of applied engineering on more than 3,200 projects, the Group has built 14,140 kilometres of rail and metro lines, 82,533 kilometres of roads and highways, 1,020 kilometres of bridges and viaducts, 3,408 kilometres of tunnels, and 313 dams and hydropower plants. Projects include the Bridge over the Danube River in Braila in Romania, and the Genoa Long Beach International Gateway in California; the expansion of the Panama Canal and the Third Bosphorus Bridge in Turkey; the Kingdom Centre skyscraper in Riyadh in Saudi Arabia, and metro lines in Copenhagen, Paris, Rome, Milan, Doha and Ryadh. Projects under construction include the New Genoa Breakwater, the Brenner Base Tunnel, Line 4 of Milan's metro, and Line C of Rome's metro, the Genoa-Milan high-capacity railway line, the Snowy 2.0 hydroelectric project in Australia, and the Trojena project for NEOM in Saudi Arabia. As of December 31, 2023, the Webuild Group achieved 10 billion in total revenues, and a total backlog of €64 billion, with over 90% of its construction backlog related to projects linked to the advancement of the United Nations Sustainable Development Goals (SDGs). Webuild, subject to the direction and coordination of Salini Costruttori S.p.A., is headquartered in Italy and is listed on the Milan stock exchange (WBD; WBD.MI; WBD:IM). Since 2021, it is member of the MIB ESG, the index of Italian companies with the best ESG practices.
