- *Webuild Tops the International Contractors Ranking for Dams & Reservoirs, and Sanitary & Storm Sewers*
- *In the transportation sector, the Group ranks in the Top 5 for Highways and Mass Transit and Rail, 8th for Bridges.*
- *Webuild also secures 10th place in the emerging Data Center sector.*

*Milan, 07 January 2025* – The Group is capitalising on global business opportunities through resilience and innovation. This long-term strategy has driven Webuild to the forefront of international companies in the water sector for over a decade, positioning the Group among the global Top 5, in the sustainable mobility sector. Webuild's leadership is further reinforced by the 2024 industry rankings published by Engineering News-Record (ENR), the leading global magazine for the construction industry.

The 2024 Top 250 International Contractors ranking, compiled by ENR based on revenues generated by companies outside their domestic markets in 2023, highlights Webuild's prominence across numerous sector categories. The Group ranks first in the Dams & Reservoirs sector and in the Sanitary & Storm Sewers sector, which is crucial for ensuring the resilience of territories against extreme weather events.

The Group has also solidified its position in the transport sector, ranking in the Top 5 for highways and mass transit and rail systems, and 8th in the bridges category. Webuild has also demonstrated significant leadership

in emerging and innovative sectors such as Data Centers, securing 10th place in the Data Centers & Web Hotels category, thanks to additional support from its Swiss subsidiary, CSC Costruzioni.

For Webuild, the clean hydro energy and clean water sectors represent a significant share of the Group's revenues, accounting for 22% of the total as of 30 June 2024. This is largely driven by the progress of technically challenging hydroelectric projects that set global best practices for innovation. Notable examples include Snowy 2.0, the largest renewable energy project in Australia, developed in partnership with the Australian subsidiary Clough, and the Grand Ethiopian Renaissance Dam (GERD) in Ethiopia. Once completed, GERD will be the largest dam in Africa. The Group's results are also supported by its subsidiary, Fisia Italmimpianti, which serves over 20 million people through desalination plants, primarily in the Middle East. Seawater desalination is one of the most promising methods to address water scarcity, providing clean and drinkable water for daily use, public supply, industrial processes, and more.

The American subsidiary Lane has also been strengthening the Group's position in delivering a series of projects aimed at modernising and expanding the road infrastructure system across the United States, from Florida to Virginia, and from North Carolina to South Carolina.

The Group also stands out in the ENR rankings for its work in bridge construction, with a track record of 1,020 kilometres of bridges and viaducts completed—equivalent to a single large bridge connecting Paris to Berlin, spanning all over Europe.

\*\*\*

*Webuild is a global leader in the design and construction of large, complex infrastructure projects in sustainable mobility, hydropower, water treatment, and green buildings. A recognized leader in the water sector, it is present in 50 countries with more than 91,000 people, ranking among the leading international players in Australia, Europe and the United States. In nearly 120 years of applied engineering on more than 3,200 projects, the Group has built 14,140 kilometres of rail and metro lines, 82,533 kilometres of roads and highways, 1,020 kilometres of bridges and viaducts, 3,408 kilometres of tunnels, and 313 dams and hydropower plants. Projects include the expansion of the Panama Canal, the Long Beach International Gateway bridge in California, the Third Bosphorus Bridge in Turkey, the Sydney Metro Northwest skytrain viaduct and bridge, the Kingdom Centre skyscraper in Riyadh, Saudi Arabia, and metro lines in Copenhagen, Paris, Rome, Milan, Doha and Riyadh. Others under construction include the new Genoa Breakwater, the Brenner Base Tunnel, Line C of Rome's metro network, the high-capacity railways between Genoa and Milan, and Naples and Bari, the Palermo-Catania-Messina high-capacity railway, the Snowy 2.0 hydropower scheme in Australia, and the Trojena dam network for NEOM in Saudi Arabia. As of June 30, 2024, Webuild Group achieved a total backlog of €65 billion, with more than 90% of its construction backlog related to projects linked to the advancement of the United Nations Sustainable Development Goals (SDGs). As of December 31, 2023, revenues totalled €10 billion. Webuild, subject to the direction and coordination of Salini Costruttori S.p.A., is headquartered in Italy and listed on the Milan stock exchange, Borsa Italiana (WBD; WBD.MI; WBD:IM). Since 2021, it is member of the MIB ESG, the index of publicly listed Italian companies with the best ESG practices.*
