

**PRESS NOTE**

**WEBUILD: MONOPOLI-FASANO HOSPITAL BUILT BY THE GROUP INAUGURATED TODAY**

**NEW PREMIUM LEVEL HEALTHCARE HUB DESIGNED ACCORDING TO MOST ADVANCED SUSTAINABILITY STANDARDS**

- *Innovative structure with approximately 300 beds, 9 operating rooms, E.R. and a nursery school*
- *The work is inspired by sustainable and bio-climatic design, and it will allow a reduction of approximately 650 tonnes of CO2 emissions per year and drinking water requirements up to 50%*

*Milano, July 26, 2025* – The New Hospital of South-East Bari of Monopoli-Fasano, a premium level healthcare hub in the South of Italy, built by Webuild on behalf of ASL Bari (Local NHS Bari) and the Region of Puglia, according to the most advanced innovation and sustainability standards, was inaugurated today.

The structure, delivered and tested, will serve 260,000 people from the provinces of Bari, Brindisi and Taranto. Covering a total area of 178,000 square metres, it has 299 beds, 9 operating rooms with intensive care and specialist healthcare and diagnostic supporting services, an E.R., a large parking area for over 740 cars, and a nursery school for employees' children. The hospital has been also located in a park where approximately 200 secular olive trees were replanted.

The New Hospital of South-East Bari of Monopoli-Fasano was built with eco-sustainable local materials, and sustainable and bioclimatic design criteria to optimize the structure's energy efficiency. Among the

various design solutions used: renewable energy sources, the reuse of rainwater to irrigate, and the production of hot sanitary water using solar energy. The photovoltaic system will allow a reduction of approximately 650 tonnes of CO2 per year; while normal water and drinking water will be saved thanks to two collection and accumulation basins of rainwater from the roofs, which will allow to reduce the potable water requirements up to 50% during the rainiest annual period.

The work is one of the 19 projects that Webuild is building in the South of Italy. It involved a supply chain of over 220 companies, 60% of these from Puglia. The structure adds to the over 200 healthcare structures, 80 airports and many other civil and eco-friendly works built by the Group globally with the aim of diminishing the environmental footprint along the entire life cycle of these structures. The Webuild Group has received many important acknowledgements in the Green Buildings sector at an international level for innovation and environmental sustainability, also collaborating with prestigious architecture firms. Among the works built: the Stravros Niarchos Cultural Center in Athens (Greece), the Al-Bayt Stadium in Doha (Qatar) and the new ENI HQs in San Donato Milanese (Italy).

\*\*\*

*Webuild is a global leader in the construction of large, complex infrastructure projects, with a focus on sustainable mobility, hydropower, water treatment, and green buildings. A recognized leader in the water sector and active in about 50 countries, the Group employs approximately 95,000 people of over 125 nationalities. It boasts nearly 120 years of experience with over 3,700 completed projects. Its track record includes 13,648 kilometres of railways, 891 kilometres of metro lines, 82,577 kilometres of roads and highways, 1,022 kilometres of bridges and viaducts, 3,462 kilometres of tunnels, and 318 dams and hydropower plants. Among its most iconic projects are the expansion of the Panama Canal, the Long Beach International Gateway bridge in California (USA), the Second Bosphorus Bridge (Turkey), the Sydney Metro Northwest skytrain viaduct and bridge (Australia), the Kingdom Centre skyscraper in Riyadh (Saudi Arabia), and metro lines in cities such as Copenhagen, Paris, Rome, Milan, Naples, Doha, Thessaloniki, and Riyadh. Ongoing projects include the New Genoa Breakwater, the Brenner Base Tunnel, the Pedemontana Lombarda Highway, Metro di Roma's Line C, the Genoa-Milan and Naples-Bari high-speed/high-capacity railways, the Palermo-Catania-Messina high-capacity railway, the Snowy 2.0 hydropower scheme in Australia and the Trojena dams in Saudi Arabia. As of December 31, 2024, the Group registered total revenues for €12 billion. As of June 30, 2025, its total order backlog stands at approximately €59 billion, with over 90% of its construction backlog related to projects linked to the United Nations Sustainable Development Goals (SDGs). Listed on the Borsa Italiana stock exchange in Milan (WBD; WBD.MI; WBD.IM), it is member of the MIB ESG index of Italian companies with best ESG practices. Headquartered in Italy, it is subject to the management and coordination of Salini Costruttori S.p.A.*
